ARUS Visa

Visa Tracking & Management Software

We have developed the unique program for you: ARUS Visa - Tourist Visa Accounting & Management Software — the ideal IT software EDNRD & GDRFA systems recommended by leading IT professionals to simplify operation and control of the visa turnover.

Accounting

The main advantage is that if a classical software written specifically for accountants, the software ARUS Visa, accounting does not require special skills and knowledge of accounting tourist visa status and payments.

Updating Visa Applications

Most important and unique feature of this software product is that the visa application information fills automatically and updates from the EDNRD & GDRFA systems.

Searching Visa Applications

Easy and fast searching visa applications by name, by EDNRD & GDRFA application and visa numbers, by passport number. Filtering by all columns like partners / status / country / typed date / company and others.

Generating Reports

Easy generating Excel reports by partners / customers, countries, visa status, payments, periods and by custom selected filters.

Opening and Printing Direct

Not required to again open EDNRD & GDRFA systems for print or view visa and applications. You can open directly from the software product.

One Staff Can Handle All

With this accounting software one staff of your tour company can handle all visa department works and works related with Online Dubai Visa Immigration ENDRD.AE and GDRFA.AE systems easily.

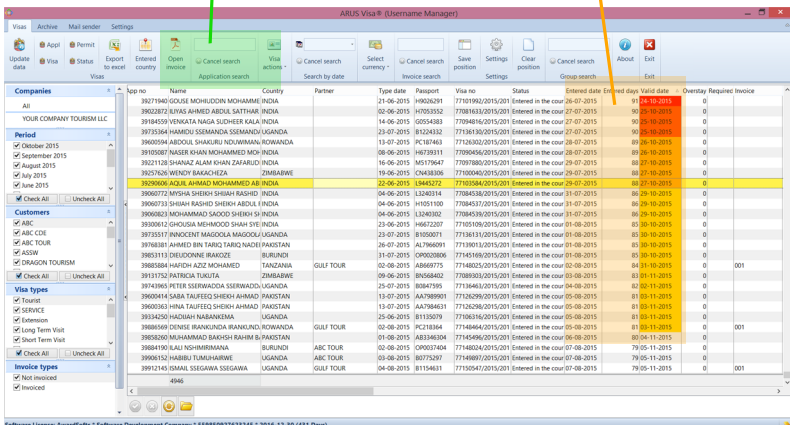

Control Payments of Customers

Management and accounting related to payments partner companies and customers. **Make Invoices, Receipts & Customer Statement Reports.**

With this software you can control visas with "**entered the country**" status,
timely identification of entered days for tourists.
Colorful System for Alerts by Valid date.
